

Ginny and the recycling

The last episode of the "Save the Woods" collection is a rhyming story that teaches kids how to recycle and respect the environment. Ginny the eagle looks forward to separating all paper, glass and plastic objects. The activities are designed to teach logical associations and properties of materials.

Subjects

Engineering (Logic)

Social skills introduced

Recycling and re-using
Respect for the environment
Respect for others

Further information

To have a greener future generation who lead sustainable lifestyles, it is important to encourage kids to develop conscious behaviours and teach them to respect the environment. Teaching how to properly recycle from an early age is a way to educate them not only to respect the environment but also to learn the properties of materials, assemblies and logical associations.

Suggested age

3-4 years

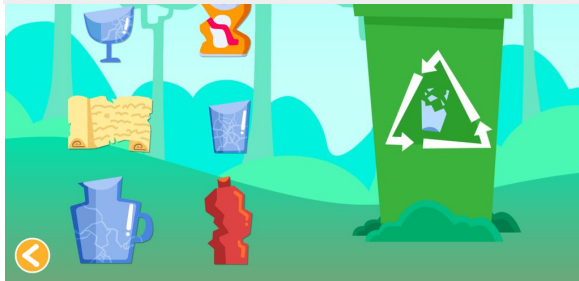

Difficulty of game

Learning objectives

- Logic

Drag the glass objects to the recycling bin

Drag the paper items to the recycling bin

Drag the plastic and metal items to the recycling bin
