

A Camp... for Bacteria!

Andrew the bear usually attends a gathering of aspiring wizards in the woods every two weeks. Despite having a little cough, he decides not to give up the meeting, where he hugs his friends, shares drinks... and also bacteria!

The mini-story teaches how important personal hygiene is as well as the health and safety of others.

Subjects

Engineering (Visual-spatial intelligence)

Social skills introduced

Friendship
Respect for others
Personal hygiene

Further information

An American study has shown that in order to teach kids the concept of infection it is enough to explain to them the existence of germs and how they spread, since 3-6 year old children are not yet able to comprehend this concept independently.

The rules for safe coexistence and health protection should be instilled from the very first years of life.

Suggested
age

3-4 years

Difficulty
of game

Learning objectives

- Visual attention
