

Corinne's melodies

Corinne the Gazelle is the music teacher of the jungle; in this story she struggles with unruly elephants and slightly out of tune turtles. The activities included in the story concern the animal-pupils of the class: the children are asked to put them in order according to some of their characteristics, stimulating their ability to perceive space.

Subjects

Engineering (Visual-spatial intelligence)

Social skills introduced

Friendship

Further information

Visual-spatial intelligence is a cognitive ability to be acquired and trained in pre-school age; identifying the spatial relationships between objects helps kids to interact more confidently in the world around them, relating properly to others and to other objects.
