

Dino and Giusy And the relay!

"The Oceanics" collection ends with a relay race. Giusy and Dino participate enthusiastically with logical reasoning activities being proposed. This series set in the ocean closes with an important lesson: like the octopus Mickey who has an ink stain, we too have special signs that distinguish us from others.

Subjects

Mathematics
Engineering (Visual-spatial intelligence)

Social skills introduced

Friendship / Inclusion
Emotions
Preventing bullying

Further information

Visual-spatial intelligence is a type of cognitive ability that is important in the development of kids because it allows them to select and control the stimuli collected from the surrounding environment. A playful context and captivating stimuli can be good premises for educating kids in visual attention and logical reasoning.
