

LESSON WITH DIGITAL SUPPORT

Face-to-face lessons: connect your mobile device to a TV/monitor or to the IWB via cable or mirroring (Chromecast or Apple TV).

Integrated digital education or Distance learning: connect to the lesson via smartphone on which the app is installed and share the mobile phone screen. (Remember to turn down the volume of your smartphone to avoid annoying whistles or echoes)

Read the story or listen to the narrator. To make the lesson more fun, start the **animations** present in each story screen by touching the moving characters, if possible leaving the device audio active.

When you reach a **game screen**, ask the kids (or one child at a time) to solve the question. If the content includes **extra content**, you can take advantage of **printable pdfs** to be integrated with the exercise and **questions to understand the text** and in-depth analysis.
