

LESSONS WITHOUT DIGITAL SUPPORT

Face-to-face lessons: start the app on a tablet or smartphone (invite kids to look at it on their tablet if the school has one).

Integrated digital education or Distance learning: start the app on your tablet or smartphone and if possible invite kids to look at it on their device at home.

Read the story or listen to the narrator. To make the lesson more fun, start the **animations** present in each story screen by touching the moving characters, if possible leaving the device audio active.

When you reach a **game screen**, ask the kids (or one child at a time) to solve the question. If the content includes **extra content**, you can take advantage of **printable pdfs** to be integrated with the exercise and **questions to understand the text** and in-depth analysis.
